

Maps and Systems of Sets

FOUNDATIONS_10_1394550966845440

Definition 0.1. A map between systems of sets is a map from some system of sets to some system of sets.

FOUNDATIONS_10_3290499861446656

Definition 0.2. Let f be a map between systems of sets. f is subset preserving iff $x \subseteq y$ implies $f(x) \subseteq f(y)$ for all $x, y \in \text{dom}(f)$.

Let f preserves subsets stand for f is subset preserving.
